## System Config > Text Message

Last Modified on 03/14/2019 12:08 pm EDT

The Text Message screen is where API information can be added for texting integration. To enable text messaging with parents, a third party vendor is needed. For more information on the vendors and required information, click here .

## Setting Up Text Messaging

Once the necessary information is gathered from the vendor, the text messaging can be setup in the system. Follow the steps below:

1. Click Setup, then select System Config

2. Click the Text Message tile

3. Complete the Setup Text Message Account section

Setup Text Message Account	
*Text Message Service Provider: Nexmo ▼	
*API Key:
