

One Call Now Integration

Last Modified on 06/17/2020 7:59 am EDT

One Call Now is an extra service within the Platform that allows centers the ability to send out mass phone calls to parents within the center. This service replaces the traditional method of calling parents one by one or using a telephone tree. Phone calls are entered as a text message into One Call Now, then the parents are called through the server with the message entered. This is a quick and easy way to inform parents of important information.
