

# Engagement Overview

Last Modified on 09/06/2023 10:54 am EDT

Procure Solutions has developed engagement functionality for Procure SchoolCare Works which is designed to help centers, daycares, preschools and before and after school programs build meaningful connections with parents and families while relying on Procure SchoolCare Works as their center management system.

This engagement functionality seamlessly transfers your center's family, staff and room data from Procure SchoolCare Works.

**Please Note:** Family data will sync to Engagement when changes are made, a full sync of all data will take place every night. A manual sync can be initiated to allow you to refresh your data between systems, without having to wait for the nightly automated sync to run. Manual syncs are limited to 1 per hour and the time to complete the sync will fluctuate over the course of the day. You can continue working within Engagement while the sync is running.

[Sign up for one of our group training sessions](#) to learn more!

**Admin Training** - learn how to use the admin portal dashboard, update general school settings, view child and staff profiles, create lesson plans, assessments, newsletters and meal plans.

---

## Tracking Student Development

Procure's engagement functionality empowers your center to track in-class activities and development milestones that can easily be shared with parents.

- [Learning Activities](#) quickly provide your parents with updates around the different learning activities their child participates in throughout the day.
- [Observation Activities](#) use a mobile device to track your students accomplishing new milestones.
- [Assessment & Development Tracking](#) allows staff to record each student's progress and milestones across your state's standards and easily access these records.
- [Lesson Plans](#) help your staff plan out the curriculum, attach milestones and share these lesson plans with your parents.

---

## Staff Resources

Staff profile information will sync over from Procure SchoolCare Works during the daily sync to Engagement.

- [Staff can send and receive messages](#) to and from other staff members from the website and mobile app.
- [Clocking in/out by your staff members](#) is quick and easy using their 4 digit PIN on the parent

kiosk!

- As an admin, you can [run reports](#) with data such as employee hours and clock in/out times.
-
